

F12

FINISHING

The knitted, elastic cuff made with **FIT-WRIST** technology is pleasant to the touch and perfectly adapts to the shape of the wrist, ensuring complete comfort during work.

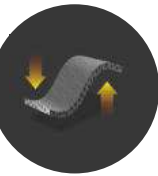

INSERT

The **SAFEEL** insert fits perfectly to the hand, ensuring high wearing comfort, and also has a safe, BPA-free composition.

COATING

F-NITREAL is an innovative technology based on pure, filler-free, lightly foamed nitrile, which provides high grip and breathability. For even greater grip and grip accuracy, the glove features orange nitrile dots.

CHARACTERISTIC

Advanced protective gloves with a high level of cut protection. Enhanced comfort is provided by an ultralight, thin, seamless liner that provides improved flexibility and a perfect fit. The microporous nitrile coating provides 360° breathability. Additional reinforcement between the thumb and index finger ensures ergonomics, a secure grip, and extended glove life.

SIZE: 6-11

ENVIRONMENT: dry / wet / oily

BRANCHES:

- ✓ Metal industry, sheet metal, metalworking
- ✓ Assembly/warehouse/maintenance work
- ✓ HVAC - Heating, Ventilation and Air Conditioning
- ✓ Storage

STANDARDS: EN ISO 21420:2020,
EN 388:2016+A1:2018 (4X42C),
EN 407:2020 (X1XXXX)

The gloves retain their protective properties even after repeated washing. Confirmed by tests in accordance with EN 388 and EN 407 standards, performed after three washing cycles at 60°C.

The Touchscreen Glove allows you to work with touchscreens.

Silicone-free, confirmed by laboratory testing (FTIR test).
