

NOS

FINISHING

GRIP-SUPPORT technology provides additional support at work. The wide, spacious cuff allows you to slip the sleeve inside the glove for even more protection from injury.

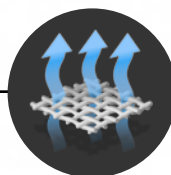

INSERT

COTTONFRESH

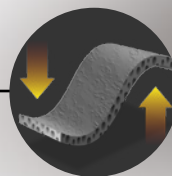

combines the advantages of a natural ingredient, cotton, with effective antibacterial protection.

The unique formula of the insert ensures softness and feeling of comfort while preventing the growth of fungi and bacteria inside the glove.

COATING

F-NITREAL is a technology based on a pure silicone-free composition. Compared to natural materials such as natural rubber, the nitrile guarantees high protection as well as resistance to damage – does not delaminate, crumble and not degrade.

CHARACTERISTIC

Extremely durable glove for hard works. The unique coating structure protects against sharp objects while working and guarantees safe grip in wet environments. The antibacterial soft cotton insert effectively drains moisture and provides optimum ventilation of palm.

SIZE: 9-10
